

Facility Management Services

MPW's Facility Management division provides a turnkey approach to facility management and labor support services with capabilities that focus on reducing downtime, improving productivity and quality, and minimizing total spend. MPW applies an analytical approach to facility management by constantly evaluating key performance indicators and seeking additional ways to streamline customers' operations.

MPW enhances customers' technical capabilities by applying best practices learned through our extensive experience at client sites. MPW also improves system reliability by evaluating and documenting current practices and engineering time saving, efficiency improving alternatives for customers.

Partnering with MPW creates quantifiable cost savings for customers by allowing them to free up time to focus on their core competencies. MPW is one of North America's largest industrial cleaning and specialty service companies, with a proven commitment to innovation.

MPW Associates use waterblasting technology to remove paint build-up on walls, floors and grates. The Facility Management team applies the procedures required by ISO 14001 Quality Management Process to each customer job scope.
