

Industrial Restoration

Natural and environmental disasters interrupt production and, when not properly controlled, cause long-term devastation. Within hours of a crisis, MPW's dynamic restoration professionals arrive on-site to assess damage, to mitigate environmental concerns and to prioritize a specialized restoration plan. Once the project scope is outlined, team leaders begin the recovery process to minimize customer downtime.

MPW's team of professionals have over 30 years of experience in industrial cleaning and in-depth restoration services in municipal, commercial, industrial and manufacturing settings. MPW works with government entities, general contractors, civil engineers, insurance companies and plant personnel to remedy natural and environmental disasters that strike unexpectedly.

MPW mobilizes and coordinates logistics expertise from our fixed-based network of over 40 facilities, employing only those methods that meet or exceed industry standards. Despite the catastrophe, MPW is committed to safely providing the highest quality service and immediate response to ensure a successful restoration in complex environments and a smooth transition to a state of normalcy.

Restoration services include:

- Decommissioning services
- Decontamination
- Environmental restoration
- Fire damage recovery
- Remediation (structural cleaning)
- Storm damage
- Vandalism restoration
- Water/Flood damage

MPW's project management process ensures full accountability for personnel, equipment and services. Project managers seek restoration methods that cost effectively minimize disruptions to daily business operations.

MPW technicians use a scissor lift to access overhead beams damaged by the fire. Following remediation procedures, numerous coats of primer and paint were applied, restoring the manufacturing facility to pre-loss conditions.

Contact your local MPW Representative today for more information on MPW's industrial restoration capabilities.
