

Nuclear Power Services

MPW's Nuclear Services division consists of knowledgeable and experienced professionals with a primary focus on specialized nuclear services and industrial cleaning projects. Services include cleaning Emergency Service Water (ESW), raw water and Reactor Cooling Water (RCW) pipe systems; Hydro Excavating for replacement piping; floor drain cleaning and decontamination (dose rate reduction); and outage support.

Since 1972, MPW has established an unparalleled record of safety compliance and environmental responsibility. MPW is committed to maintaining the safest possible working environment for its own employees and for the employees of its customers. MPW's comprehensive Health & Safety Program serves as a model for our industry.

Whether hydro-lazing, industrial vacuuming, or high purity water services are required, MPW has the experience to safely and effectively meet your needs.

MPW Industrial Services is the leading provider of integrated technology-based services in North America. Headquartered in Hebron, Ohio, MPW has been providing rapid response to meet the diverse needs of industrial clients for over 30 years.
