

# Transportation Services

MPW specializes in the safe handling, transportation and disposal of non-hazardous liquid and solid wastes to approved subtitle D landfills throughout North America. MPW accepts all types of non-RCRA waste streams for non-hazardous stabilization. Technical personnel have the knowledge and experience necessary to ensure that transportation services are performed in strict compliance with local, state and federal regulations.

MPW certified drivers are professionally trained to mitigate risk and to transport materials including industrial wastewater treatment, filter cake, sludge, solid waste, soluble oil and machinery coolants, fly ash, absorbent media and spill pads, latex paint, and numerous industrial and manufacturing waste streams.

MPW maintains a partnership with its customers to enhance operational efficiencies and apply personal attention to project specific requirements, while minimizing costs. Our team of technical support staff performs individual waste stream analyses to ensure appropriate disposal.

Our fleet of DOT-approved tractor trailers, tandem axle roll-off trailers, tankers, vacuum trucks, containers and frac tanks is expertly maintained to meet emergency and routine needs.

To meet emergency needs, MPW technicians are available 24/7 to expedite the proper transportation solution. Support staff provides informed advice with issues relating to waste manifest preparation.

MPW delivers transportation and disposal services for demolition contractors, government agencies, engineering firms, industrial and manufacturing facilities, and municipalities.

**Contact your local MPW Representative today for more information on MPW's transportation services.**
