

MPW Products Direct is committed to serving customers' vast industrial water needs. From our friendly and knowledgeable sales team to the highly skilled field service technicians, MPW provides the total product and service solution.

MPW is a leading supplier of outsourced water treatment systems and services. Our engineering teams have designed the most advanced mobile water treatment systems, carefully selecting components that balance performance and value. We proudly offer these same components to our customers tailoring the best possible combinations for peak performance on each application. Contact MPW Products Direct today, and put our experience and buying power to work for you.

Products

- Industrial grade ion exchange resins
 - Weak acid cation resin
 - Strong acid cation exchange resin (H+ form)
 - Weak base anion resin
 - Strong base anion exchange resin
 - Mixed bed resin
 - Softening resin (Na+ form SAC)
 - Condensate polishing resin
 - Special application ion exchange resins
- 8-inch brackish and seawater reverse osmosis (RO) membranes – standard and low energy
- Bag and cartridge filter housings
- Polypropylene melt blown depth cartridge filters
- Polypropylene bag filter elements
- Pre-engineered systems (packaged UF/RO/EDI systems)
- Granular activated carbon
- Traditional and speciality filtration media
 - Quartz gravel and sand
 - Garnet
 - Anthracite
- Industrial water quality instrumentation

Turnkey Services

- Re-beds of ion exchange resins in customer-owned deionization (DI) systems
- EDI retrofits
- Re-beds of multimedia in customer-owned pressure filters
- Re-beds of customer-owned activated carbon systems
- Membrane replacements in customer-owned RO
- System evaluations "Quick Study"
- Custom lateral design and installation
- Membrane cleanings, studies and autopsies
