

# Automated Tube ID Cleaning

Latest technology for hands-free heat exchanger and fin fan ID cleaning.

Constant and consistent clean throughout the entire length of the tube.

Designed to run single, double or triple lances, offering a safe and efficient clean under the toughest of conditions.

## FEATURES

- Systems can be used with pressures from 10K to 40K psi
- Multiple lance sizes can be used without modification
- Lightweight and easy to set up and run
- Adjustable feed and return rates for consistent cleanings
- Can be set up for horizontal or vertical applications

## BENEFITS

- Remotely operated, removing operators from the line of fire
- Reduces personnel needs, lowering cost
- Reliable, consistent cleaning improves exchanger efficiencies
- Proven reliability in the toughest environments
