

Bundle Blaster Shell Side Cleaner

Remotely cleans shell side of small- to medium-sized tube bundles, up to 36 feet.

Bundle is placed on hydraulically actuated rollers for rotation during cleaning process while cleaning head runs horizontally on track above.

Operated remotely; powered with a self-contained, diesel-powered hydraulic system.

FEATURES

- Portable, automated rail system
- Quick disassembly and adjustment
- Adjustable-speed hydraulic rollers
- Up to 30,000 psi washes
- Adjustable stroke length
- Full 360-degree cleaning capability

BENEFITS

- Safer, more efficient cleanings
- Ensures full penetration between bundle tubes
- Quick and easy set up
- Increases efficiency and decreases downtime
