

Condenser Cleaning

Dart Cart system allows crews to clean more tubes per shift than high-pressure water or chemical cleaning, at lower cost.

Downtime is reduced utilizing an array of equipment, heads – maintaining integrity of vulnerable tubes.

Results in optimal condenser performance, cleanliness, heat-transfer coefficient.

FEATURES

- Maintains tube integrity
- Works on resilient deposits including manganese and calcium carbonate scale
- Custom-engineered to perfectly fit specific tube dimensions
- Services backed by 90 years of tube-cleaning experience
- Up to 400 psi
- Up to 50 gpm

BENEFITS

- Dart Cart system allows crews to effectively clean more tubes per shift than high-pressure water or chemical cleaning at a significantly lower cost
- Reduces downtime
- Optimizes heat-transfer coefficient
- Maximizes power output
