

Cryogenic Cleaning (Dry Ice Blasting)

Eliminates post-cleaning waste removal due to instant vaporization of dry-ice pellets upon contact

Eliminates need to dismantle equipment, shortening stoppage times, effectively maximizing production

Reduce downtime, increase life of equipment, eliminate unnecessary costs

FEATURES

- Safe on virtually any surface
- Non-abrasive and non-conductive
- Approved by EPA, FDA and USDA
- Adjustable blast pressure
- Able to clean around delicate or expensive equipment with minor prep
- Eliminates risks of decontamination and releasing toxic chemicals

BENEFITS

- No post-cleaning waste
- Shorter stoppage times
- Improves production quality by reducing defects caused by dirty equipment
- Increases life of equipment
