

HFD Autodrive

Portable, air-powered, remote-controlled device for hands-free feeding of high-pressure blast hose.

Smaller and lighter than a typical rotary-hose device; primary use is the cleaning of pipes with rotary jetting heads.

Permits thin-line coupling, whip checks to pass through, allowing the rotary head to reach long stretches of pipe.

Consistent in-and-out feed rate of the hose ensures a thorough, efficient cleaning.

FEATURES

- Can be used with blast hoses from 1/2 inch to 1 3/4 inches in diameter
- Works with whip checks and thin-line couplings
- Joystick control station
- Adjustable forward and reverse feed rate
- Utilizes safety back out preventer
- Truck-mounted with adjustable stand systems for all areas

BENEFITS

- Eliminates need for workers to enter potentially dangerous blast areas
- Ultra-portable and lightweight
- Consistent and thorough cleanings
- Increases efficiency and decreases downtime
- Ability to clean long stretches of pipe
