

# M1-RV Remote Vacuuming

**Increases cleaning efficiencies and eliminates need for technicians to enter potentially dangerous confined space areas.**

**Vacuums in conjunction with water jet, auger, fracturing solid debris for easier removal.**

**Simultaneous cleaning and vacuuming.**

## FEATURES

- Operator manages cleaning process via joystick and video feed
- Cameras and lights on unit allow the operator to see inside dark or debris-filled areas
- Includes optional water jetting nozzles for removing debris
- Flexible design allows for maximum vacuuming radius
- Auger attachment to break up hard soil and slag
- Fully articulating vacuum head and auger

## BENEFITS

- Eliminates need for technicians to enter dangerous areas
- Auger and jetting nozzles allow for simultaneous cleaning and vacuuming
- Easily set up and operated by a single technician
- Increased cleaning quality results in shorter outages
- The robotic base allows increased mobility
- Easily ascends and descends stairs and ramps
- Increases cleaning efficiency
