

RB X-40 and M1 Crawler

RB X-40 attaches to a fixed position or the robotic M1 crawler base.

Eliminates the need for technicians to enter potentially dangerous confined space areas.

Using a video monitor, technicians aim the spray and adjust the nozzle with a joystick-like mechanism.

FEATURES

- Operator manages cleaning process via joystick and HMI video feed
- Cameras and lights on the unit allow the operator to see inside dark or debris-filled areas
- Includes spray-mist mechanism for cleaning camera
- Flexible design allows for maximum spray radius
- Base and nozzle adapt for large foaming jobs
- Rotates 270 degrees horizontally and 120 degrees vertically

BENEFITS

- Eliminates the need for technicians to enter dangerous areas
- Increases cleaning efficiency
- Easily set up and operated by a single technician
- Increased cleaning quality results in shorter outages
- The robotic M1 Crawler base allows increased mobility
- Easily ascends and descends stairs and ramps
