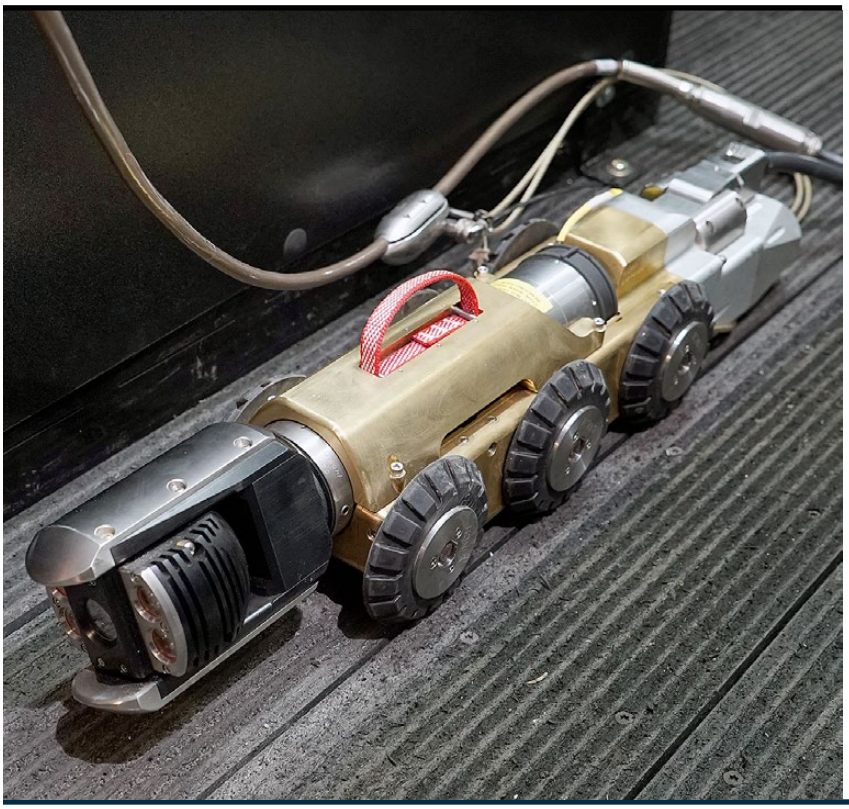
Camera Inspection

NASSCO certified, fully equipped to perform Nondestructive Testing (NDT) using video, still images.

Automated camera completes inspections on pipes from six to 200 inches in diameter, up to 1,000 feet in length.

Equipped with mobile command station containing onboard computer systems that record inspection, produce photos, video.

Camera operated in one of three remote-controlled vehicles including a waterproof, active-line float.



FEATURES

- Sanitary storm, water, sewer and gas pipe inspection and rehabilitation
- Waterproof float to inspect active lines
- Ability to locate branch line inlets/ outflows
- Variety of wheels and treads for optimal traction
- Condition assessment
- Trailer can run on plant power or off its own generator
- CCTV inspection equipment
- Data acquisition

BENEFITS

- Reduces risk of damaging customer pipelines
- Active pipeline inspection eliminates shutdowns
- Pinpoints exact locations of obstructions or defects
- Float operates regardless of water level and debris
- Eliminates need for workers to enter potentially dangerous confined spaces
- Increases efficiency and decreases downtime
- Provides “before and after” assessments
