

Caster Flume Mini Excavator

Automated solution for breaking slag deposits from steel mill caster flumes using a hydraulic hammer bit.

Eliminates the need for workers to enter confined spaces during deslag operations.

Excavator requires just one operator.

FEATURES

- Extended hammer bit
- 20K water jet bar on excavator boom
- Skid for placement on rollers
- Locking pins to secure to roller
- Camera for improved visual reference
- Diesel, propane or electric propulsion options
- Digging height and radius both greater than nine feet

BENEFITS

- Eliminates confined space entry during deslag
- More efficient cleaning of steel mill caster flumes
- Decreases safety-related incidents
- Increases productivity while meeting customer requirements
- Decreases cleaning duration
