

# Submersible Crawler

Completes video inspections in tight areas and on difficult surfaces with HD camera and high-efficiency LED flood lights.

Pressure-washing and vacuuming attachments execute cleaning projects with the safest hands-free techniques.

Internal batteries provide optimum portability and offer up to eight hours of operation after a single 90-minute charge.

## FEATURES

- Industrial-strength vacuuming and pressure-washing attachments
- Safest hands-free equipment available
- Magnetic wheels allow crawler to scale metal walls
- Built for underwater inspections up to 50 meters in depth
- LCD controller sensors measure pitch, roll, direction and depth

## BENEFITS

- More efficient inspections and cleanings of hard-to-reach or underwater areas
- Hands-free cleaning techniques decrease safety-related incidents
- Decreases cleaning duration
- Increases productivity while meeting customer requirements
