

Automated Excavator Shotgun

Automated solution for water jetting and surface preparation.

System combines a rotary shotgun arm with an excavator base for easy mobility to provide a safe and innovative alternative to manual shotgun cleaning.

Climate-controlled cab with position and water-jet controls allows operators to work longer without becoming fatigued.

FEATURES

- Pressures up to 20k psi
- Cleaning radius of 360 degrees
- Vertical reach up to 12 feet
- Horizontal reach up to 17 feet
- In-cab controls for high-pressure water
- Can be operated with 600 horsepower pump
- System can be customized for multiple applications including tube lancing and bundle exterior cleaning

BENEFITS

- Decreases safety-related incidents
- Removes operator from jetting area
- Wider cleaning radius and reach
- Increases productivity
- Decreases operating cost
