

# Automated Lightweight Shotgun

Automated solution for water jetting and surface preparation.

Modular system combines a rotary shotgun arm and a lightweight base for easy mobility to provide a powerful alternative to manual shotgun cleaning.

System can be anchored to floor grating or weighted with the optional counter-balance reservoir.

## FEATURES

- Lightweight modular system
- Single operator setup and use
- Pressures up to 40k psi
- Cleaning radius of 180 degrees
- Quick change cleaning nozzles
- Fits through standard 21-inch manway

## BENEFITS

- Decreases safety-related incidents
- Removes operator from blast area
- Easy to deploy and maintain
- Increases productivity
- Lowers operating cost
