

Mobile Bundle Shellside Cleaner

Remotely cleans the shellside of tube bundles up to 25 feet in length.

Hydraulic crane arm positions cleaning head over the bundle.

System requires little setup time and has nominal footprint on customer blast pads.

FEATURES

- Portable trailer system
- Remote-operated hydraulic crane to position cleaning head
- Adjustable-speed hydraulic rollers
- Cleans bundles up to 25 feet long and 8 feet in diameter
- Can be positioned to clean each face of tubesheet
- Up to 10,000 psi washes
- Flow rates up to 100 gpm
- Full 360-degree bundle cleaning capability

APPLICATIONS

- Safer and more efficient cleanings
- Ensures full penetration between bundle tubes
- Quick and easy set up
- No electric hookup required
- Increases efficiency and decreases downtime
