

Rigid Lance Machine

High-pressure hydraulics to clear debris from the inner diameter of tube bundles.

Five rigid lances, each featuring a specialized, high-pressure nozzle for consistent and thorough cleanings.

Elevated, temperature-controlled cab removes personnel from the jetting zone and provides excellent visibility.

FEATURES

- Five five-sixteenths-inch lances
- Up to 20,000 psi
- Maximum flow of 50 gpm
- Adjustable stroke length
- Controller Area Network (CAN) bus control system
- Hose-reel management eliminates tangling
- Internal hose break
- Stabilizer bars increase protection during unit movement
- Storage capacity for 10 34-foot rigid lances
- HVAC system for the operator station
- Bundle roller with 100,000 pound capacity
- Corrosion-resistant, heavy-gauge aluminum

BENEFITS

- Just one employee necessary for full operation
- Three times faster than manual cleanings
- Fully self-sufficient (no external air or power supply needed)
- Treats varied bundle lengths up to 30 feet
- Cleans five tubes at once for increased efficiency
- Wear pads replace rollers to reduce lance damage
- Longer equipment lifespan, decreasing maintenance costs
