

Cyclone Vacuum System

Cyclone collects and unloads flowable material into a variety of waste receptacles.

Tank is engineered to withstand virtually any waste, including abrasives, sludges and hazardous substances.

External vacuum source required.
Pairs well with MPW's industry-leading vac truck fleet.

FEATURES

- Adjustable discharge height of up to 11 feet
- Trailer mounted for ease of mobility
- Built with abrasion-resistant materials for added durability
- Four discharge valve variations
- Handles most materials that will flow through 4-, 5- or 6-inch hoses
- Dual-grounding capabilities when paired with an MPW vac truck

BENEFITS

- Versatility and customization eliminate need for additional equipment
- Can be easily towed and maneuvered by a one-ton truck with dual rear wheels
- Straightforward construction design streamlines routine maintenance
- Reduces risk of vac truck contamination
