

Liquid Ring Vacuuming

Dry, wet vacuum cleaning solutions manage the safe removal, transport, disposal of non-hazardous wastes from job sites, including remote areas.

Produces outstanding suction power, long-lasting performance, higher payload on the truck.

Safe for use on explosive gases.

FEATURES

- Oil free
- Pump is swivel-mounted between the mounting feet
- Suction and pressure flange allows connection on either side of shaft
- Mechanical seal
- Connection flanges can be swiveled
- Only one water drain

BENEFITS

- High-quality pumps produce higher suction level and power
- Simple design ensures long-lasting performance
- Compact, light-weight aluminum build nets higher payload on the truck
- Tolerates liquids and solids for flexible range of applications, including explosive gases
- Liquid sealant allows higher handling temperatures and inlet gases
