

Fugitive Dust Mitigation

Remove explosive airborne dust particles from your facility.

High-Efficiency Particulate Air (HEPA) vacuums compatible with a variety of surfaces, including air conveyance systems, conveyor belts, silo tanks, high ceilings.

Preventative maintenance program eliminates potential for explosions.

FEATURES

- High-pressure vacuuming with static dissipating hose
- Fully grounded operation for live-wire work
- Cable tray cleaning system
- Adjustable air and vacuum pressure
- Foam cleaning system
- Safe removal of all dust including aluminum, bronze, magnesium, zinc, coal and sulfur
- Wet ring vac-line attachment injects water into vacuum line

BENEFITS

- Eliminates risk of igniting combustible materials
- Eliminates shutdowns
- Single-mode filtration enables loading of wet or dry materials with no changeover
- High-density, biodegradable foam eliminates scrubbing
- Ability to clean hard-to-reach areas
- Eliminates airborne dust during cleaning process
- Increases efficiency and decreases downtime
