

Vacuuming Services

Dry and wet vacuum cleaning solutions.

Safe removal, transport, disposal of non-hazardous wastes from job sites, including remote or inaccessible areas.

Latest SCR technology allows trucks to operate in enclosed facilities.

FEATURES

- Fleet consists of transport tankers, Supersuckers and dry and wet maxi TurboVacs
- Payload capacity of 18 cubic yards
- Positive displacement vacuum pumps providing airflow at 5,000-6,000 CFM
- Static ground cable
- Temperature gauges inside and outside for continuous monitoring
- Equipment inspection completed prior to and after each use
- Technicians attend rigorous hands-on, site-specific training program to maintain quality and ensure safety

BENEFITS

- Decreases safety-related incidents
- High-powered airflow solution to pick up the toughest solids and liquids
- Reduced differential for more effective fuel economy
- Single-mode filtration enables loading of wet or dry materials with no changeover required
- Large cyclone with large passageways for greater airflow and better fuel economy
