

Paint System Management

Comprehensive cleaning and management of paint booth systems.

Integrated approach results in higher production efficiency and cost savings.

MPW evaluates the data obtained from system performance monitoring to modify cleaning schedules and operational approaches, improving first-time pass rates.

SERVICES

- Paint booth set-up & cleaning
- Blast booth design & operation
- Skids, jigs, fixtures & dolly management/cleaning
- Deep cleans
- Filter management (air & paint waste filters)
- Robotics support
- Regenerative Thermal Oxidizer (RTO) cleaning
- Water jetting (10K-40K PSI)
- Vacuum services
- Production support & logistics
- Coatings removal
- Waste (chemical & sludge) management
- Preventive maintenance
- Defect analysis
- Shutdown services

INDUSTRIES SERVED

- Automotive Services
- Electric Vehicle Services
- Power Generation Services
- Petro-Chem Refining
- Pulp and Paper
- Steel / Metals
- Manufacturing Services
