

Industrial Coatings Services

MPW is a recognized industry leader in both surface prep and the application of protective coatings for industrial manufacturers throughout North America.

Industrial Coatings Team will work with you to develop a safe, cost-effective, customized solution.

From basic protection for exposed surfaces to high-performance linings for highly corrosive environments, we will develop the right solution for you.

SURFACE PREPARATION TECHNIQUES

- High-pressure water jetting (10-40k psi)
- Recyclable abrasive blast cleaning, utilizing multiple media and technologies
- Wet blast cleaning
- Vacuum blast cleaning
- Solvent cleaning
- Chemical cleaning
- Dry ice blast cleaning

INDUSTRIAL COATINGS SERVICES

- Plant-wide protective coating maintenance
- Pipeline protective wrapping
- High-Pressure water jetting surface prep
- Robotic surface prep for pipe and tanks

CLEANING TECHNIQUES

- Water jetting (10-40k psi)
- Chemical cleaning
- Triple-wash-triple-rinse
- Confined space entry
- Manual scraping of solid chemicals
- Concrete scarifying
- Particulate air filter vacuums
- Bleach solutions
- Use of HEPA negative air machines
- Manual cleaning

INDUSTRIES SERVED

- Automotive
- Chemical Processing
- Food & Beverage
- Manufacturing
- Petrochemical/Refining
- Pharmaceutical
- Power Generation
- Pulp & Paper
- Steel
