

Industrial Air Utility Services

**MPW'S
MODULAR
COMPRESSED
AIR SOLUTION
DELIVERS 100%
GUARANTEED
CLEAN, DRY
AIR**

MPW Industrial Air Utility Services (IAUS) builds fully-automated, energy-saving compressed air modules to customer requirements, replacing the need for customers to own, operate, maintain and monitor their compressed air needs.

The compressed air module provides specific air quality standards to meet customer requirements with modules that replace compressors, dryers and ancillary compressor room equipment. Skilled technicians remotely monitor the compressed air solution 24/7 to ensure that 100% process "uptime" is maintained.

The MPW Industrial Air Utility Services solution offers a financial savings advantage for your company. Our solution will eliminate your maintenance, repair and rental costs. Future capital expenses are eliminated as well. MPW will also maximize your energy savings.

Contact us to implement a state-of-the-art compressed air system at a fraction of the cost of asset purchase and maintenance while increasing the reliability of compressed air at your facility.

FEATURES

- MPW designs, engineers and manufactures complete modular air systems in-house at our corporate fabrication facility
- Designed for industry-best energy efficiency
- 24/7 remote monitoring and access
- Data acquisition system to ensure air quality parameters are always met
- 100% reliable, instrument air quality
- N+1 or N+2 compressor redundancy at each plant site
- 24-hour operational and engineering support
- Controlled environment within modular facility
- Option for top quality air (Class 0 per ISO 8573-1:2010) to protect sensitive downstream equipment for reliability and long life

BENEFITS

- Guaranteed performance
- MPW provides and maintains most recent technology
- 10% - 30% energy cost savings
- Eliminates maintenance, repair and rental costs
- MPW manages the entire air operation and any associated risks
- Eliminates capital investment
- Experienced compressed air experts provide technical knowledge

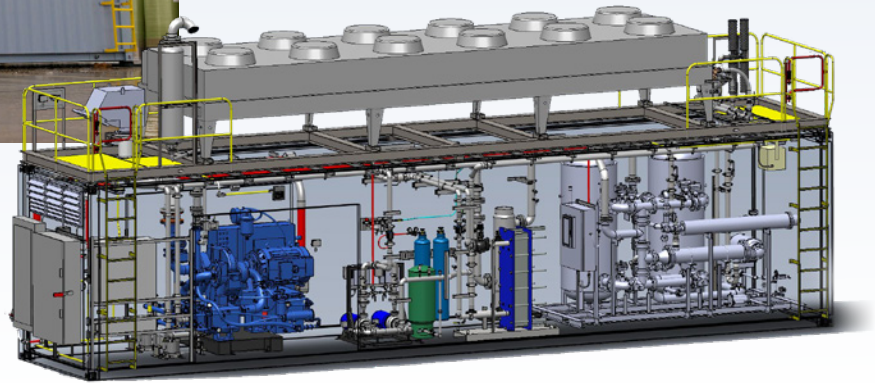

INDUSTRIES

- Automotive
- Chemical
- Clean Rooms (Medical & Electronic)
- Food & Beverage
- Manufacturing
- Mining
- Petrochemical/ Refining
- Pulp & Paper
- Power Generation
- Steel

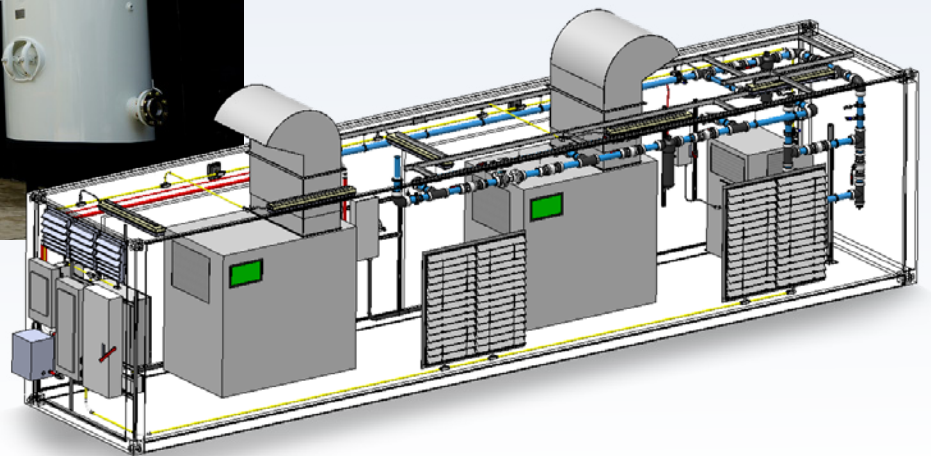

MPW builds Custom Modules in containers and small buildings to provide customers with the most advanced, energy efficient compressed air systems.

CENTRIFUGAL COMPRESSED AIR MODULE

ROTARY SCREW COMPRESSED AIR MODULE

Contact MPW to provide you with details on a high reliability, no maintenance, energy efficient compressed air utility that assures 24/7 monitoring and uptime, with no capital outlay required.
