

Electric Vehicle (EV) Services

MPW partners with electric vehicle manufacturers to provide cutting-edge solutions for today's advanced EV manufacturing processes, including technical cleaning, environmental services and technology advancement.

MPW's growth strategy focuses on the long term, providing continuing support services from plant construction to full operation.

MPW is a preferred technical cleaning company for EV manufacturing facilities.

SERVICES

- EV Support
- Technical Cleaning
- Environmental Services
- Technology Advancement

BENEFITS

- The EV battery construction department can operate continuously with no shut down period
- Available battery recycling and delivery to recycling centers
