

Industrial Water Services

**MPW'S FOCUS
IS TO ENHANCE
WATER QUALITY
AND REDUCE
OPERATING
COSTS.**

Relying on advanced technological products and services, MPW's experienced and highly trained personnel can complete virtually any industrial water purification treatment project.

MPW quickly implements customized and/or emergency response systems to meet your long-term water purification needs. Our highest priority is your peace of mind.

MPW's systems are custom-designed based on the water source and customer requirements. Our flexible design allows systems to be assembled to remove specific undesirable properties. We adjust configurations to optimize and accommodate space restrictions.

With greater capacity, MPW's units require fewer exchanges, resulting in reduced operational pauses and decreased mobilization costs. Our delivery and exchange drivers are trained technicians who can immediately troubleshoot the system to minimize delays.

MPW understands the urgency of its customers' needs, responding rapidly to inquiries and providing immediate technical support 24 hours per day.

INDUSTRIES SERVED

- Power Generation
- Nuclear Power
- Petrochemical/Refining
- Pulp & Paper
- Automotive
- Food & Beverage
- Manufacturing
- Steel

WATER PURIFICATION SERVICES

- 24/7 Emergency Response
- Engineering Design
- Mobile Systems
 - Clarification
 - Deionization (DI)
 - Service Exchange DI
 - Media Filtration
 - Reverse Osmosis (RO)
 - Ultrafiltration (UF)
- Build, Own, Operate & Maintain (BOOM) Systems
 - Site specific, custom-designed containerized systems
 - Full/part-time and customer operated service options
- Ash Pond Remediation
- Wastewater Treatment
- Products Direct: Industrial Water Parts and Service
 - Media and membrane sales
 - Re-beds of ion exchange resins and mixed media in customer-owned systems
 - Membrane replacements in customer-owned systems
 - Membrane cleaning and studies
 - EDI retrofits
